

We are also seeking approval for 2 signs down the front of the property which are fixed from a commercial vehicle (crane).

The signs are 2400mm wide by 1500mm high, as below. The colours and layout match with the rest of **[redacted]** business.

These signs are fixed from a crane at the front of the property. The crane is non-operational, the engine doesn't run at all. The crane is just used as a signage post.
