SUMMARY

The purpose of this document is to present the City's 2024-25 Capital Program, which comprises:

- **\$31.1 million Asset Renewal Program**
- **\$11.0 million New Capital Program**

The City has prepared the 2024-25 Capital Program based on modelling for real and projected financial scenarios in alignment with the Long-Term Financial Plan.

Of note, the Asset Renewal Program of \$31.1 million includes a \$7.2 million budget for the renewal of the Walkaway-Nangetty Bridge and a budget sum of \$4 million for the potential renewal of the Youth Playground at Stow Gardens at the completion of a community consultation exercise.

With exception of these two significant renewal projects, which are likely to be completed in 2025-26, the overall Capital Program sees a modest reduction in the volume of projects due to a larger than usual backlog of carry forward projects. The carry forward projects are typically a result of long lead times for the delivery of fleet & plant related items, project resourcing issues and the additional workload associated with the development and implementation of the new City Enterprise Resource Program. A reduction in the Capital Program is intended to allow for a "catch up year" and avoid a similar backlog of work at the commencement of 2025-26.

Currently excluded from the Program are several large grant funding opportunities that have been submitted under the federal Regional Precinct Partnership Program and the Community Energy Upgrade Program. The Capital Program for 2024-25 may be subject to change dependent upon the outcome of these grant applications, subject to Council approval.

ASSET RENEWAL PROGRAM

INTRODUCTION

The Asset Renewal Program contains a total of just over **\$31.1 million** to renew existing assets. This amount includes approximately **\$7.5 million** of grants funding:

- Regional Road Group funding (TBC) \$ 1,200,000
- Roads to Recovery funding (TBC) \$ 1,243,725
- Bridge Replacement Program \$ 4,739,307
- Blackspot Program funding \$ 255,334
- Geraldton Aquarena User Group funding \$ 7,500
- Various Cricket Associations & Boards funding \$ 11,000
- MRWA contribution \$ 40,000

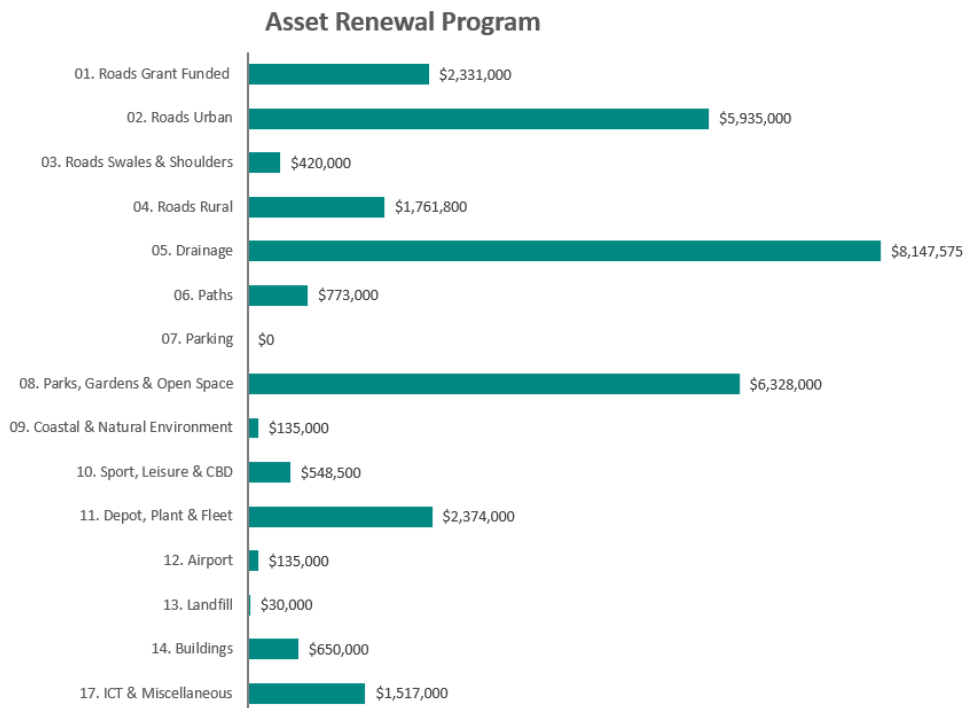

The City has a large portfolio of community assets under its control which forms an integral part of providing services to the community. These assets include roads, drainage, paths, bridges, lights, buildings, airport, plant and fleet, coastal infrastructure, parks, and open space recreational assets. The replacement cost of our assets is more than \$1 billion dollars, with the annual budget allocation associated with renewal of these assets forming a large part of the City’s Capital Program.

The City has evaluated the priorities of nominated projects at a project and portfolio level, developing a Program focusing on asset and network condition, risk, and level of service.

The projects listed are subject to change during the year due to potential for unexpected changes in asset condition and priorities requiring a reallocation of funding accordingly.

The following figure summarises proposed FY2024-25 expenditure at a portfolio level.

Figure 1

PORTFOLIO COMMENTARY

The following figure summarises budget trends for select portfolios over the past 4 years.

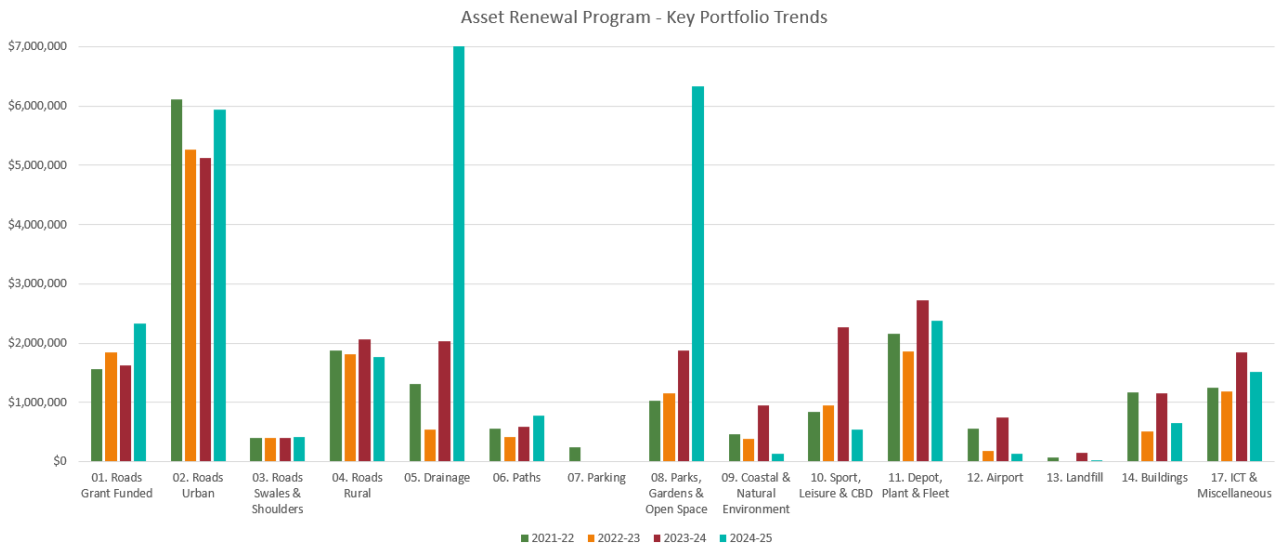

Figure 2

Roads Grant Funded: Five priority roads will be renewed with up to two-thirds of the budget being funded by the State Government through the Regional Road Group and Blackspot programs. The road projects are: Goulds Road, Nangetty - Walkaway Road, Flores Road, Place Road, and the Flores Road & Eastward Rd intersection.

Urban Roads: The renewal program for Urban roads considers the condition and the hierarchy of the road. Of the 833km of sealed roads, the City plans to renew 25.6km in FY2024-25.

Swales and Shoulders: The City allocates funding each year towards renewal works on road swales and shoulders, which preserves the road pavement and surface. Each year 50km of swales and shoulders are rehabilitated.

Rural Roads: The City plan to re-sheet 28km of rural roads across the Greater Geraldton region and renew four key intersections.

Drainage: Projects have been prioritised based on routine inspections with priority given to known flood areas. Condition assessments on the underground drainage assets are 90% complete and this data will be used to inform future renewal programs. The drainage renewal program includes the replacement of the Walkaway-Nangetty Bridge which will be a significant project to deliver that is likely to start in the current year but only complete in 2025-26.

Paths: The City continues to prioritise the renewal of pathways in high traffic, elevated risk areas and are concentrating on the renewal of aged paths. The City will replace approximately 2km of footpaths.

Parks: The Parks team continue to renew parks, play systems, and water infrastructure based on the condition assessment of these assets. Aged barbeques are being replaced with smart barbeques that enable remote monitoring of faults and usage.

Coastal and Natural Areas: Fixtures and the protective coating of Francis Street Finger Jetty will be renewed by a marine specialist contractor.

Sport, Leisure, and City Precinct: The Aquarena Water Slide is due for renewal and the entry, exit and turnstile system is due for replacement. Renewals in the CBD will be consistent with the approach to concentrate on high traffic areas to ensure a safe attractive facility is provided to locals and visitors alike.

This approach is being applied to the Stow Gardens Youth Precinct redevelopment which is reaching the end of its life and is due for renewal soon. This project is likely to start in the current budget year and be completed in 2025-26.

Depot, Plant and Fleet: Fleet renewals are based on the ten-year asset management plan and take into consideration utilisation, safety, maintenance and increasingly our impact on carbon emissions.

Airport: It is now time to refresh the runway 03/21 painted line markings which was completed in 2019. The airport terminal will also receive an internal and external repaint.

Landfill: The ground water bore will be replaced.

Building: The City continues to experience cost escalations in the building sector. Building renewal projects to the value of \$0.64 million are planned for FY24-25.

NEW CAPITAL PROGRAM

INTRODUCTION

The New Capital Program contains almost **\$11.0 million** to plan, design and construct brand new projects or to upgrade existing assets. Funding sources for the 2024-25 Capital Program is detailed in the below table:

General Revenue	\$4,247,374
Secured Grants	\$198,068
Unsecured Grants	\$630,558
Transfer From Reserves	5,950,000
TOTAL:	\$11,026,000

The New Capital Program has been developed from a list of over two hundred project nominations, which have been evaluated using the City's 11 endorsed community criteria. Projects have been placed into one of five portfolios, with Officers using the criteria scoring, project information, grant funding opportunities and other factors to develop the Program.

The FY2024-25 Program is part of a 3 Year Program. The 3 Year Program builds upon the work undertaken in previous years, with the Program refined based on new project priorities, funding profiles and a variety of other factors.

SUMMARY

The 3 major projects funded from the City's Reserves are as follows:

- Mahomets Caravan Park \$2.0 million
- Maitland Park Traffic Improvements \$2.3 million
- Microgrid Project \$1.5 million
